

COLMAR rail/road loaders are used for the construction and maintenance of railway lines. The machines can be equipped with different accessories: rail pincers, hydraulic or mechanical frame beam for moving sleepers; tamping unit; pincers for different usage; hydraulic hammer; hydraulic bush-grass cutter. COLMAR rail/road loaders are made of a strong electro welded steel and actionned by hydraulic systems realized with high quality components. The loaders are complete with security systems and are homologated to work in different countries.
